Features:

Grommets are sleeves which are installed into raised floor panels. They protect cables from being cut by the sharp edges created after cutting into a panel for wire access. In addition, they protect employee fingers from sharp panel edges.

Grommets are made from injected molded plastic resins designed for long-lasting wear and are resistant to chipping or breakage. They have a snap-in swivel lid that accommodates cables.

Remember a hole saw is required to cut the opening in a floor panel when using circular grommets.

1. Easy installation: Round shape to die out hole and save labor cost.
2. More durable: The material of socket product body is from high quality zinc alloy by process of pressure casting as integration design. It be high intensity so more durable.
